Each point uses the monthly engine with the other active assumptions; the matrix follows the active context identified in Excel. If Comparative is active, this matrix represents that Comparative rather than Base. Colours and threshold follow Excel.

## Risks, missing evidence and methodology

New investor NPV is negative at the selected assumptions and discount rate; these results do not support an automatic favourable bankability conclusion.

Undocumented conditions remain assumptions. The official logo binary and certified Aparthotel-only gross area were not supplied; 47,000 m² is a global area/allocation proxy. No contracts or actual receipts are invented.

Independent full recalculation: LibreOffice. Structural verification: Open XML SDK. Native Microsoft Excel 365 Desktop execution is unavailable in this environment; native acceptance is not claimed.
