Combined stress	2.15%	(16,925,970)	12,009,585

Investment conditions: documented capital and sales; confirmed budget and financing; validated tax; protected reserves; returns consistent with the required rate.

The report reflects the active scenario and does not optimise assumptions to force a positive NPV. It does not replace tax, legal, banking or independent valuation advice.

Current limitations: MICE lacks a documented event schedule; FF&E lacks a standalone V06 expenditure/protected-balance ledger; Excel 365 compatibility and exact V05.1 parity are not certified.
